UL www.ul.com

1. About UL

UL is a global independent safety science company with more than a century of expertise innovating safety solutions from the public adoption of electricity to new breakthrough sustainability, renewable energy and nanotechnology. Dedicated to promoting safe living and working environments, UL helps safeguard people, products and places in important ways, facilitating trade and providing peace of mind.

2. Safeguarding valuable records and data

UL provides the latest fire testing capabilities to the record protection equipment industry. With unmatched experience and insight, UL have helped to write many of the industry standards that are referenced in building codes. Using a furnace chamber, fire engineers expose the device to the temperature conditions specified in the test standard for the applicable class rating: Class 350 for paper products, Class 150 for magnetic tapes and Class 125 for flexible disks.

SP www.sp.se

1. About SP

SP Technical Research Institute of Sweden is a leading international research institute. They work closely with customers to create value, delivering high-quality input in all parts of the innovation chain, and thus playing an important part in assisting the competitiveness of industry and its evolution towards sustainable development.

2. Certification, P-mark

Based on tests in accordance with NT FIRE 017 and SP Method 1716 SP, it is possible to issue P-mark certificates. The P-mark is a widely recognized and cost effective way to demonstrate high quality performance of storage cabinets. A variety of classification types and levels are available depending on the needs of the clients.
