! CAUTION: All drawings in this manual have been prepared based on a standard model. The exterior design or component positions of other models may be different from what is indicated in the drawings. With the operation in the same.

OPENING YOUR SAFE FOR THE FIRST TIME

To open the safe for the first time, please use the emergency key. The operation in details refers to "opening the safe with the emergency key".

- Remove emergency lock cover, then insert the emergency key, and turn it count clockwise.
- Turn the knob (master key) clockwise to open the door.

⚠ CAUTION: Finish operation, pull out the emergency key and keep it in a safe place.

INSERTING THE BATTERIES

- Open the door.
- Insert 4 X AA batteries into the battery compartment.
- Under normal condition both red and green lights are on at the same time. It means the voltage is low and you should insert new batteries.

⚠ CAUTION: Replace 4 batteries by lining them up in a manner as indicated by the "+" and "-" signs. You should reset the user's code after replace the batteries.

OPENING DOOR

- Input your user's code (3 to 8 digits), each press results in one beep and the yellow light flashes.
- Press "A" (C/#) or "B" (E/ *) button, the green light will be on.
- Rotate the knob (master key) clockwise and pull outwards within 5 seconds, the door is opened.

⚠ CAUTION: The user preset code is "159". Please input the user code again if the yellow light flashes with beeps.

CLOSING DOOR

- Turn the knob (master key) counter clockwise to close the door.

AUTOMATIC LOCK

- 3 continuously wrong entries will activate the warning beeps.

! CAUTION: The key pad would be disabled during the beeping. You can only stop the beeps by opening the safe with emergency key and power-cut by removing the battery.

SETTING THE USER CODE

- Open the safe, press the reset button, start setting code when the yellow light goes on.
- Input new code (3-8 digits), and press the "A" (C/#) or "B"/E/ *) button to confirm with beeps, which indicates the acceptance and storage of the new code.
- If the yellow light flashes with beeps, the code changing is not effective, and you need to try again.

OPENING THE SAFE WITH THE EMERGENCY KEY

Upon first receipt of the safe, or either the electronic circuit malfunction or codes unknown. You could also use the emergency key to open the safe.

- Remove the cover of the emergency lock.
- Insert the emergency key, turn it count clockwise, then turn the knob (master key) clockwise to open the door.

MOUNTING METHOD

- Select a stable, dry and secure location for your safe.
 - If bolting to a wall, make sure that your safe is resting on a supporting surface (such as the floor or a shelf). Do not bolt your safe to both the floor and wall.
1. Place the safe on the selected location. Use a pencil to mark the mounting holes on the floor or wall.
 2. Move the safe and drill 2-inch-deep mounting holes (~50 mm) using the appropriate drill bit.
 3. Move the safe back in place, align the mounting holes to the openings in the safe. Insert the expansion bolts (included) through the holes and into the mounting holes and tighten them securely.
